## Proposal Submission Process

Review this for a general overview of the proposal submission process and to learn more about how the SOM Research Development Unit (RDU) can help (every step of the way, with the exception of actually submitting the proposal)!

1. Identify a funding opportunity

UCI has a license for Pivot, a funding search tool. You can also request a targeted funding opportunity search.

Write the proposal, collaborate with team members, and compile required materials, including boilerplates and LOS.

Obtain pre-submission reviews from subject matter experts and grant reviewers.

2.

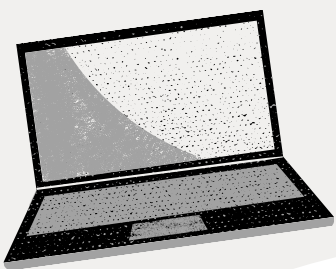

Prepare proposal

Depending on your situation, you will work with one of the following teams:

- SOM Research Support Services (RSS)
- Cancer Center
- Center for Clinical Research (CCR)

3.

Submit Proposal

Most proposals are resubmitted before being successfully funded.

Obtain resubmission reviews from subject matter experts and grant reviewers.

Need to Resubmit?

Contact the RDU

Email the RDU at [somrd@hs.uci.edu](mailto:somrd@hs.uci.edu) to get started!

Ready?
