Specimen Type	Adenovirus qPCR	Aspergillus Galactomannan EIA	Aspergillus Panel PCR (Qual)	Atypical Pneumonia Panel PCR (Qual)	Babesia duncani WA1 IgG IFA	BKV qPCR	BKV IgG Antibody	Candida Real-time PCR Panel	CMV Resistance	CMV qPCR	CMV inSIGHT™ T Cell Immunity	Coccidioides Ab EIA	Coronavirus SARS-CoV-2 RT-PCR	Dengue Virus IgG	Dengue Virus IgM	EBV qPCR	EBV inSIGHT™ T Cell Immunity	Enterovirus qRT-PCR	Everolimus LC-MS/MS	ExPeCT™ Anti-CD19 CAR-T	Fungal Plus PCR Profile I	Fungal Plus PCR Profile II	Fungitell® [1,3]-β-D-Glucan Assay	Fungitell® with Reflex to Titer	GPP PCR Luminex®	HBV Quantitative NAAT	HCV Genotypic Drug Resistance	HCV Quantitative NAAT	HDV Total Antibody	HDV RT-PCR (Qual)	HEV IgG	HEV IgG and IgM Panel	HEV IgM	HEV qRT-PCR	HHV-6 qPCR	HHV-6 IgM IFA	HHV-6 IgG IFA	HHV-6 IgM and IgG Ab IFA	HHV-7 qPCR	Histoplasma Galactomannan EIA				
abscess fluid																																												
amniotic fluid																																												
aqueous fluid																																												
BAL																																												
bone marrow																																												
bronch wash																																												
CSF																																												
eye swab +																																												
fecal																																												
formalin fixed, paraffin embedded																																												
genital swab +																																												
mouth swab +																																												
nasal asp																																												
nasal swab +																																												
nasal wash																																												
NP asp																																												
NP swab +																																												
NP wash																																												
OP Swab																																												
pericardial fluid																																												
plasma																																												
pleural fluid																																												
rectal swab +																																												
saliva swab +																																												
serum																																												
skin swab +																																												
synovial fluid																																												
sputum																																												
throat gargle																																												
tissue (qual)																																												
tissue (quant)																																												
trach asp																																												
trach wash																																												
urine																																												
vitreous fluid																																												
whole blood +
