Prioritizing Well-Being

The UCI School of Medicine and UCI Health have made physician well-being a top initiative. One of our goals is to ensure 24/7 easy access to resources, protecting our valued physicians’ wellness and promoting a supportive culture.

The information covered in this guide may or may not currently affect you, but it is important for all physicians to identify risk factors, warning signs or any concerning changes in yourself, as well as in others.

Be proactive in getting care for yourself. And if you see someone else struggling, please reach out immediately or notify another person in a position to help. Take good care of yourself and your colleagues!

The areas covered in this resource guide include:

- Self-Care Fundamentals
- UCI Resources (mental health, finances, family support)
- County, State and National Wellness Resources

Psychological, emotional and physical well-being are critical to the establishment of the competent, caring and resilient health care provider.

Take appropriate action and seek help for yourself and your colleagues as needed.
